

Temperament Testing & Safety Requirements

Please bring or fax documentation from your veterinarian for all required health measures before bringing your pet to Fenway Bark

Temperament Testing:

Your pet will be assessed by one of our professional staff members for the group temperament.

For the safety of your dog and our other guests, you will be required to complete a profile of your dog's behavior and this information will be used along with observation to place your dog in the right conditions at Fenway Bark. Full disclosure of your dog's past behavior is important to ensure the safety and happiness of your pet while staying at Fenway Bark.

We will not allow intact males to participate in any groups events including daycare. Private care options are available for intact males

Your pet should know basic commands before staying or playing at Fenway Bark.

We look forward to having your family pet as our guest.
